

Citelum – A different light for the planet

Taking a holistic approach to city lighting, Citelum ensures that not only is your lighting efficient, but as a service to the community, it is beautiful, making people who use public lighting feel safer, creating new visitor experiences and is more sensitive to the environment by reducing the upward waste loss of lighting into the atmosphere above.

We are committed to a policy of providing high quality products and services in a manner which will protect and improve the environment for all of our activities.

We will work closely with our clients, contractors, the community, industry and external agencies to establish the controls by which we can make a positive contribution towards innovative and cost-effective and sustainable environmental outcomes.

Responsible management of environmental issues is an essential part of achieving our business objectives.

Accordingly, we are committed to conducting our activities in ways which will:

- Improve our awareness and management of environmental risks and avoid, reduce and prevent pollution.
- Comply with environmental legislation and other requirements.
- Promote waste minimisation and energy management.

We, through our management and workers, will ensure our operations comply with this policy by developing, implementing and maintaining a system based on AS/NZS ISO 14001.

The Environmental Management System will:

- Set a clear policy direction for environmental issues and objectives.
- Contain measurable objectives and targets;
- Establish systems for auditing monitoring and reporting performance.
- Identify and promptly resolve any non-conformances and document any necessary procedural changes.

This policy shall be reviewed on an annual basis.
